

A Whole new Dimension For DIRECT DRIVE RACING ! Club and Home-Set Racing from JK Products

JK Products have established a reputation for great design in Stainless steel chassis with their X range of 1/24 and 1/32 chassis and now after more than 18 month's of research and development comes the 1/32nd Scale Direct drive Range! Yes! You heard it! Direct Drive! No pinion, no Spur Gear, just direct drive of the rear wheel via the motor shaft. This patent pending design has been made possible by a rather smart chassis design and a newly developed motor specifically for this application.
